To whom it may concern,

NCC Group confirms that the MeterSIt DOMUSNEXT 2.0 MMU6 DB-GSME and MeterSIt DOMUSNEXT 2.0 MMU6 DB-GSME Cost Reduction DB-GSME continue to hold their CPA certificate under the CPA Assurance Maintenance Process.

NCC Group have examined all legally relevant (metrology) firmware changes incorporated in the HW version:revision pairs 66.14 (DB-GSME) and 66.15 (Cost Reduction DB-GSME), with application firmware RC 52.14 (25:E9:0D:5E) Release and have concluded that none of these changes are security impacting. The previously evaluated versions were RC 52.14 (25:E9:0D:5E) with HW version:revision pairs 66.12 (DB-GSME) and 66.13 (Cost Reduction DB-GSME).

In line with the CPA Assurance Maintenance Process, NCC Group therefore confirms that the updated versions - MeterSIt DOMUSNEXT 2.0 MMU6 Gas Meter RC 52.14 (25:E9:0D:5E) Release and MeterSIt DOMUSNEXT 2.0 MMU6 DB-GSME Cost Reduction DB-GSME, with HW version:revision pairs 66.14 and 66.15 respectively – maintains the certification of the original (certificate number NCSC-1433053936-3767).

Yours Sincerely,

Shabrez Raja
